J-TECH INVERTER

J-Tech Inverter Refrigerator

Sophistication in Freshness and Energy-Savings

Introducing the NEW Sharp J-Tech Inverter Refrigerators, revolutionizing energy saving technology and precise cooling for a truly smart food storage.

SJ-FTG21AVP-SL/BK (1)

SJ-FTF24AVP-SL (1)

J-TECH INVERTER REFRIGERATOR

SAVES AND PROTECTS

A Revolutionary Technology

Sharp J-Tech Inverter Refrigerators help trim electricity costs by running on low energy consumption.

Equipped with advanced Plasmacluster Ion Technology, prevent food contamination and eliminate bacteria to keep food fresh as it was on its first day.

Sharp and Simple.

You may think of your refrigerator as a simple box of storage that magically keeps your food cold and edible for a longer time.

And perhaps some refrigerators are like that.

But not Sharp J-Tech Inverter Refrigerators.

SAVES

J-TECH INVERTER

Inverter technology that runs on low on power consumption and reduces electricity costs

36 GRADUAL STEPS

Lessen Energy and Costs

J-Tech Inverter has 36 gradual cooling steps. It saves more energy and cost compared to conventional inverters with 7 step steps and traditional technology with only 1 step step that wastes more energy to move from one step to another.

INNOVATIVE INVERTER MECHANISM

Minimize Electricity Consumption

J-Tech Inverter refrigerators reduce energy consumption by compressor rotation in high and low operating modes. Non-Inverter models that completely switch on or off use higher amounts of energy— adding to electricity cost.

*Saving percentage may vary per model

HIGH AND LOW ROTATION

Help Conserve Energy

The J-Tech Inverter compressor runs on a high rotation speed to reach the optimum temperature level within a quick period of time. It is complemented with a constant low rotation speed to keep temperature at a consistent level. This conserves more energy compared to refrigerators using a conventional inverter or traditional technology.

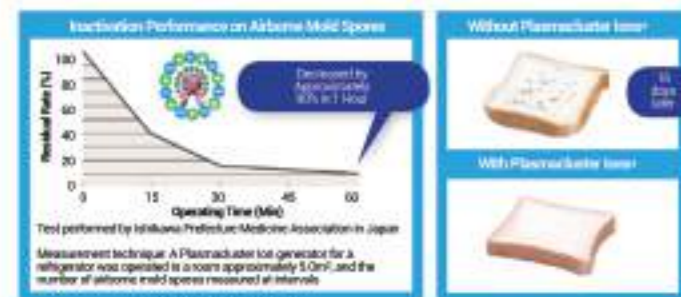

PROTECTS

A smart storage to keep your food edible but also as crisp and fresh as it was on the first day

PLASMACLUSTER ION TECHNOLOGY

Keeps Food Fresh

As refrigerator doors are frequently opened and closed, food becomes exposed to contaminants. Eliminate threats like mold*, bacteria and other allergens* up to 99% with Sharp's unique Plasmacluster Ion Technology. By releasing positive and negative ions in the refrigerator this keeps your food microbe-free.

*Mold-generating experiment (Test was conducted by Sharp Corporation)

AN EFFECTIVE WAY TO EXTEND FRESHNESS

Prolongs Shelf-life

Plasmacluster ions are identical with the ions found in nature. Positive and negative ions are surrounded by water molecules and then are released inside the fridge. These ions deactivate the effects of microbes and bacteria, prevent the growth of molds, and destroy odor molecules.

HYBRID COOLING SYSTEM

A Balanced Cooling Environment

Refrigerators typically rely on direct cooling in keeping food fresh, but may cause them to dry up. The Hybrid Cooling System employs a cooling fan on top of the unit and an aluminum panel at the rear to manage the distribution of cool air in the fridge interior. This allows the refrigerator to retain enough moisture and prevent the instantaneous drying of food.

With Conventional Fan System

With Hybrid Cooling System

Advantages of Hybrid Cooling System

- Prevents excessive dryness
- Avoids uneven cooling and over cooling
- Prolongs the crispness of food

PRECISION COOLING

Retain the Best Storage Temperature

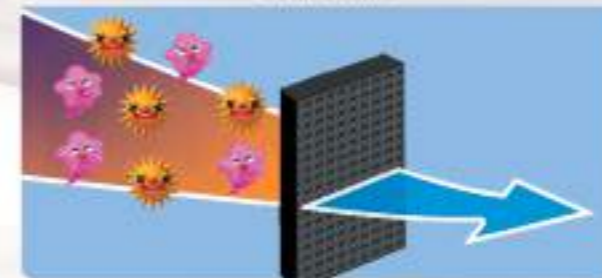

36 gradual cooling steps provide the exact temperature for your storage needs. Conventional inverter and traditional technology have only 7 cooling steps and 1 cooling step, respectively.

DEODORIZING FILTER

Avoid odor contamination and off flavor

A deodorizing filter is placed in the back of the refrigerator compartment to reduce both odors and bacteria. When air passes through the filter, the molecules that create smells are oxidized and broken down.

Features found in models:
SJ-FTF24AVP-SL, SJ-FTF22AVP-SL
SJ-FTG21AVP-SL/BK, SJ-FTG15AVP-SL/BK

ADJUSTABLE SHELVES

Maximize Space

There's a place for everything in your fridge. Fit large or small objects by positioning the shelves according to the height of your food items.

TECHNOLOGY

- For more efficient energy
- LED Lighting
- Door Alarm
- Temperature Control

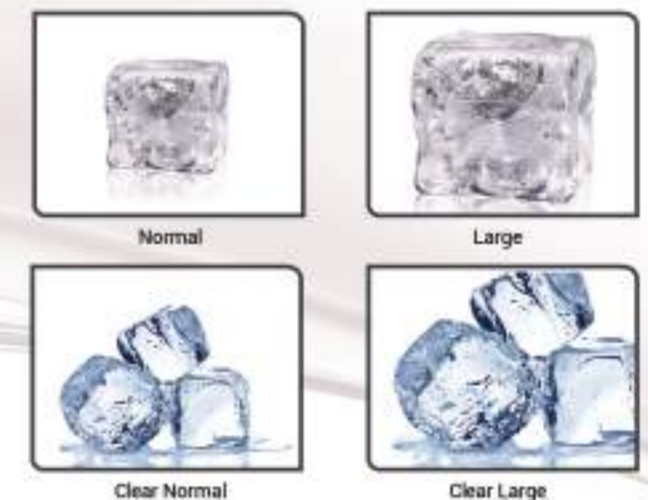

RAPID COOLING

Prevent Spoilage and Food Waste

The J-Tech Inverter compressor's high rotation speed reaches the optimum temperature level in a shorter period of time compared to conventional inverter and traditional technology. This reduces food spoilage by chilling your food in a shorter period of time.

CONVENIENT ICE MAKER

Make four different styles of ice: clear normal, clear large, normal and large. The touch-control panel on the door indicates the stages of ice-making process.

J-TECH INVERTER

Sharp Refrigerators go beyond keeping your food cool, with innovations such as the unique Plasmacluster Ion Technology, Ag+ Cu Nano Deodorizer, and Hybrid Cooling System, among many others.

Keep your food preserved for even longer without over-drying it, in an odor-free and highly sanitized environment. It's easy with Sharp Refrigerators.

AG+ CU NANO DEODORIZER

Odorless Safekeeping

The enhanced Ag+ Cu Nano Deodorizer ensures no odor lurks around inside your fridge. With a deodorizing filter emitting Ag+ molecules, it traps odor and helps maintain the natural taste and smell of food.

FULL-REAR LED LIGHTING

48+ energy-efficient white LEDs produce a beautiful bright glow, making it easier than ever to find items you're looking for.

TOUCH-CONTROL PANEL

Easy Fingertip-operated Controls

- Plasmacluster Ion Function
- Temperature Control

Control Options:

SLEEK DOOR HANDLES

Full-length door handles designed for convenient use by people of all heights and ages.

DOUBLE FRENCH DOOR

Designed to enhance your kitchen interior with its sleek doors, The Sharp Double French Door will surely complement your lifestyle.

No Frost Inverter Refrigerator

SJ-FTF24AVP-SL (24.0 cu. ft.)

SJ-FTF22AVP-SL (22.0 cu. ft.)

FINE HAIRLINE DESIGN

Add luxury to your kitchen with stain-free glass doors in a contemporary fine hairline design.

Unit Dimension (WxHxD)

SJ-FTF24AVP-SL
892 x 1830 x 771 mm
SJ-FTF22AVP-SL
892 x 1720 x 771 mm

FEATURES

Rated Input:

SJ-FTF24AVP-SL (185W)
SJ-FTF22AVP-SL (185W)

- J-Tech Inverter Operation
- Hybrid Cooling System
- Ag + Cu Nano Deodorizer
- LED Lighting
- Door Alarm
- Touch Panel Design
- Plasmacluster Ion Technology
- Smart Defrost System

J-TECH INVERTER

Sharp Refrigerators combine Japanese-engineered energy-saving technology, precise cooling and unique self-sanitizing functions, making it a smart food storage.

With guaranteed durability, every Sharp J-Tech Inverter Refrigerator is designed to last. It's simple with Sharp Refrigerators.

7 SHIELDS PROTECTION

Sharp's 7 shields protection, protects your refrigerator from fire, excess voltage, vibration, instability, insulation, thunder, and even rodents.

ADDITIONAL ENERGY SAVINGS

The eco-sign inside the refrigerator compartment turns from blue to orange to remind users to close the door.

AG+ NANO DEODORIZER

For a Truly Odor-Free Interior

Even if you religiously clean your refrigerator, it will still have a certain odor that comes with the variety of food that's stored inside. The Ag+ Nano Deodorizer ensures an odor-free interior with a filter that disperses Ag+ molecules, which is responsible for trapping odor molecules.

GRIP HANDLE

This stylish grip handle does not only give an elegant look to your refrigerator but it also allows you to open the door from any position, effortlessly.

D-PRO

Simple yet sophisticated, a model that fits perfectly at any home for your ever-growing needs.

No Frost Inverter Refrigerator

SJ-FTG21AVP-SL/BK (21.0 cu. ft.)

SJ-FTG15AVP-SL/BK (15.0 cu. ft.)

SJ-FTG21AVP-SL/BK

GLASS DOOR WITH FINE HAIRLINE DESIGN

Add luxury to your kitchen with stain-free glass doors in contemporary fine hairline design

Unit Dimension (WxHxD)
SJ-FTG21AVP-SL/BK
800 x 1750 x 735 mm
SJ-FTG15AVP-SL/BK
645 x 1772 x 697 mm

FEATURES

- Rated Input:
SJ-FTG21AVP-SL/BK (145-170W)
SJ-FTG15AVP-SL/BK (144W)
- J-Tech Inverter Operation
 - Hybrid Cooling System
 - Ag+ Nano Deodorizer
 - LED Lighting
 - Door Alarm
 - Touch Panel Design
 - Plasmacluster Ion Technology

NO FROST

Freshness is in store for you when you keep your perishables safe with Sharp Refrigerators. Retain foods' vibrant colors and essential vitamins and minerals, while locking in their natural taste.

Find the perfect fridge for you and start storing smartly- all of the good stuff, inside your Sharp Refrigerator.
